

# VARUN M

Senior SDET | QA Automation Engineer | Quality Engineering

Bengaluru, India · varunm.work1@gmail.com · +91 99162 10081 · linkedin.com/in/varun-m-78a106294

## PROFESSIONAL SUMMARY

SDET / QA Automation Engineer with **nearly 7 years** (since 2019) across **cybersecurity, banking/fintech, logistics, and edtech** SaaS platforms. End-to-end quality ownership — test strategy, UI and REST/OpenAPI automation (Python/Pytest, Java/Selenium/TestNG), CI/CD (Jenkins, Bitbucket, Allure), and containerized test environments (Docker, AWS EC2). Reduced manual regression effort ~60% and CI flakiness ~40%, and contribute to release-readiness across multiple products — increasingly with **AI-assisted testing** (Claude, Cursor, Gemini). Recipient of Cyware's "Above & Beyond" award; U.S. H-1B petition approved. A former branch head and SQL trainer who has trained 30,000+ students — bringing rare communication, ownership, and leadership to engineering.

## TECHNICAL SKILLS

**Languages:** Python, Java (OOP), SQL

**Test Automation:** Selenium WebDriver, Pytest, TestNG, Page Object Model, Hybrid & Data-Driven frameworks

**API Testing:** REST API testing, Postman, OpenAPI/Swagger, RestAssured, JSON validation

**CI/CD & Reporting:** Jenkins, Bitbucket Pipelines, Allure, Git

**Cloud & Infra:** AWS (EC2, Spot Instances), Docker, Kubernetes (basics), Argo CD (basics), feature-flag & environment management

**Testing Types:** Functional, Regression, Sanity, Integration, System, Cross-browser, Mobile (iOS/Android), API, Email

**AI-Assisted QE & Tooling:** Claude, Cursor, Gemini, Jira Rovo, Bitbucket code review — test design, automation scaffolding, AI-assisted code review, defect triage

**IDEs & Dev Tools:** IntelliJ IDEA, PyCharm, Visual Studio Code

**Process & Tools:** Agile/Scrum, Atlassian suite (JIRA, Confluence, Bitbucket), sprint planning, release management

## PROFESSIONAL EXPERIENCE

### Test Yantra Software Solutions Pvt. Ltd.

Bengaluru, India | Aug 2019 – Present

*Employed by Test Yantra throughout; engaged across the group's training institute (QSpider / JSpider) and enterprise client projects in banking, logistics, and cybersecurity.*

#### Senior SDET — Cyware Labs (Cybersecurity SaaS)

Feb 2025 – Present

- Drive **end-to-end QA for CSAP**, a core product in Cyware's cybersecurity suite — manual and automation across UI, REST/OpenAPI, and mobile (iOS/Android).
- Build and maintain automated suites in **Python (Pytest, Selenium)**; debug and stabilize regression failures and track release-cycle regression across roughly quarterly releases.
- Manage test environments with **Docker** (stack up/down and backend ops — feature flags, user provisioning) and basic **Kubernetes / Argo CD**.
- Within the QA team, test **MFA and central-platform** stories — test design, execution, and automation — plus email testing and customer-issue resolution.
- Led end-to-end QA for the company's **full website revamp**: validated implementation against Figma designs (layout, typography, spacing), automated broken-link detection, and partnered with design, marketing, and the CEO — earning Cyware's "**Above & Beyond**" award.
- Apply **AI-assisted QE** (Claude, Cursor, Gemini, Jira Rovo) end-to-end — drafting manual, automation, and API test cases, scaffolding automation, raising and triaging JIRA defects, and reviewing code in Bitbucket.
- Operate in 2-week Agile sprints (JIRA, Confluence, Bitbucket); contribute to sprint planning, retrospectives, and release reviews.

#### QA Engineer — OpenText (Logistics; Toyota, Japan)

Jun 2024 – Jan 2025

- Owned QA for a module of a logistics platform for a Japanese (Toyota) client; gathered and analyzed requirements directly with the Japan-based team.
- Authored test plans and test cases, executed testing on the localized Japanese UI, and delivered knowledge-transfer sessions to the team.
- Recognized by development, product, and QA managers for QA quality and effort.

#### QA Automation Engineer — Aspire (Banking / FinTech, Malaysia)

*Jul 2023 – May 2024*

- Built and maintained **Java / Selenium / TestNG** hybrid automation for a banking platform (~70% automated, ~30% manual coverage).
- Performed REST API validation and executed regression suites through **Jenkins CI**.

#### Test Engineer, SQL Trainer & Branch Head — QSpider / JSpider (EdTech)

*Aug 2019 – Jun 2023*

- Served **concurrently as a Test Engineer and SQL Trainer** — testing on the regular shift while teaching morning, evening, and weekend batches — and later led a branch alongside both responsibilities.
- Tested the institute's edtech platform end-to-end — student and trainer apps, plus HR, counselling, fee-payment, and attendance modules — and proposed requirements and cross-system integrations.
- Trained **30,000+ students** in SQL, manual testing, and Java fundamentals; ~90% of batches completed with high satisfaction, building a strong reputation as a sought-after trainer (recognized by the CEO and senior trainers).
- Promoted to **Branch Head (Mumbai)**: led a **22-member team**, owning training delivery, student placements, counselling, HR, monthly sales targets, and college / BPO partnerships.

### KEY ACHIEVEMENTS & RECOGNITION

---

- **Cyware “Above & Beyond” Award** — for leadership and exceeding expectations on the website QA initiative (awarded by the CEO & CTO).
- Reduced **manual regression effort by ~60%** and **CI pipeline flakiness by ~40%** through automation and flaky-test remediation.
- Trained **30,000+ students** and led a **22-member branch** — a rare blend of engineering depth and people leadership.
- **U.S. H-1B petition approved** (valid through 2028).

### EDUCATION

---

**Bachelor of Engineering (B.E.)** — KSIT College, Bengaluru
